AT&T Group Calling

[EXPLORE RATES](#)[COVERAGE MAPS](#)

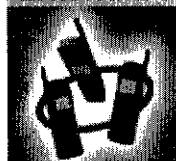

AT&T Group Calling is the revolutionary communications service that allows unlimited, local wireless calls within business groups of up to 200 co-workers while in their Group Calling Area. Which means that your workforce can communicate more cost effectively within their workgroups.

Open the Lines of Communication

[LEARN MORE](#)

With the quality, performance, security, and coverage of AT&T Group Calling, there's no longer a need to connect your workgroup with two-way radios or pagers. You can talk and listen at the same time. Callers don't speak over each other. Listeners hear each critical word of conversation. And, there's no running to a phone to answer a page. Work gets done faster, with fewer mistakes.

Extend Your Workgroup Communications

[LEARN MORE](#)

With AT&T Group Calling, workgroups of up to 200 members can expand their wireless communication ability to include up to five wireless or landline numbers (group numbers) in the Group Calling Area in addition to those in the workgroup: a supervisor, dispatcher, the home office, the plant, or key vendors and clients.

Expand Your Workgroup Options

[LEARN MORE](#)

With AT&T Group Calling, workgroups of up to 200 members can expand their wireless communication ability to include up to five wireless or landline numbers. Get even more out of AT&T Group Calling with options like remote access to voicemail messaging and text messaging up to 150 characters. Whether your workforce is on site or off, your business can keep its competitive edge.

Explore the Possibilities

[LEARN MORE](#)

Explore examples of how the powerful combination of Group Calling with Digital PCS features such as text messaging and Caller ID, as well as the dispatch services of AT&T Digital PocketNet[®] Service, can deliver bottom-line results.
